

MUMBY Charriot Ride on Seeder

The Mumby Charriot Seeder is a **ONE PASS ride on landscape seeder** – capable of undertaking both small and large areas efficiently – producing a firm level seedbed with germination guaranteed.

There are two models available 91cm (36" and 110cm (42") working widths, both models are fitted with the same features

FEATURES:

- High quality cast steel notched rollers both front and rear
- Seed hoppers fitted with stainless steel shutter seeding system with seeding rates of 5-40gms per sq. metre for both grass and wildflower seed mixes
- Two power units Honda F560 (5hp) for the MCS910
Iseki SA603 (6hp) for the MCS910 and MCS1100
- Gearbox – 6 forward and 2 reverse (both models)
- Seeding output – up to 7,000 m2 per hour
- Well proven seeding method
- Calibration tray
- Stand on foot plate for ease of use
- Highly manoeuvrable

Fitted to Honda F560
High quality castings

Stand on Footplate

Snail gauge

Fitted on Iseki SA603

WORKING PRINCIPLE

The Mumby Charriot Seeders have been developed from a well proven seeding method using the Cambridge roller system – where a front notched cast ring roller prepares the surface by breaking up the clods – levelling and pressing down the soil – leaving small indentations and ridges in the earth – ready to accept the seeds spread across the full width of the hopper (not in lines) the seeding rates can be accurately calculated from 5-40gms per sq. metre – A stainless steel seed metering shutter system is used for long life with a calibration tray – a rear notched cast ring roller presses down and splits the small ridges – raking and covering the seeds leaving a perfect seedbed with small ridges that hold the moisture and protect the seeds from excessive wind and rain. The Mumby Charriot eliminates the need for a tractor mounted seeder where manoeuvrability and a quality finish are required without the problem of tractor tyre marks left in the surface.

SPECIFICATIONS

Model	MCS910	MCS1100
Working width	91cm (36")	110cm (42")
Power Required	Honda F560 5.5hp or Iseki SA603	Iseki SA603 6hp
Seeding rates	5-40gms per sq. metre	5-40gms per sq. metre
Hopper capacity litres	60	70
Working output m2	Up to 6,000 Sq. metres per hour	Up to 7,000 sq. metres per hour
Dimensions seeder only	110cm wide x 100cm long x 70cm high	130cm wide x 110cm long x 90cm high
Weight	420kg	478kg
Commodity code	8432 3019	
Country of origin	United Kingdom
